(54) LITHIUM SECONDARY BATTERY

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a lithium secondary battery which has high output potential and is superior in low-temperature characteristics and negative electrode characteristics.

SOLUTION: A lithium secondary battery containing solid electrolyte contains solid electrolytes, whose compositions are different between a positive electrode and a negative electrode, also contains a solid electrolyte layer between the both electrodes, where the solid electrolyte layer is formed of a composition that is different from those of the positive electrode and the negative electrode.

LEGAL STATUS

[Date of request for examination] 11.01.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

3566891

[Date of registration]
